

De Wereldwijzer

Wereldwijzer 1- September 2021

Dear Parents and Caregivers,

How nice that we were able to welcome all the children present again! The fact that we are allowed to have a more normal life means that we can also organise more in the field of education (eg.: group independent extra instructions) and organisational area (eg.: school trips). We are also working on letting the parents enjoy more with what we are doing in the school.

Together with all colleagues, we have cleaned up the school and redesigned certain places. For example, we have beautiful technology towers at the entrance, about which more later in the Wereldwijzer. The library has also been given a beautiful new place with a great supplemented collection!

In short, the school is buzzing and we are looking forward to making it an educational and enjoyable year!

Sincerely, also on behalf of the team,

Ronith Root
Interim director IKC Wereldwijs

(Educational) continuous line IKC wide

The toddler activities are starting again!

The toddler activities are starting again! From Monday 4 October.

Is your toddler ready for an extra challenge? Is it nice for a child to get used to school now?

Then participating in a toddler activity is a wonderful opportunity.

The 3.5-year-old toddlers participate 1 day a week (Mon, Tues or Thurs) in a fixed group during a preschool activity in the lower grades. The permanent pedagogical employee Linda will guide the group to and in the lower classes as standard.

Playing is learning and learning is playing; that's the starting point. In the lower group the activities are at preschool level, toddlers will participate at their own pace. Each child is challenged at their own level to take steps. We follow the school program.

The toddler preschool meetings have also started again. These are consultations between the pedagogical staff and the teachers of education. Topics include coordinating the activities around the themes and preschool activities are discussed for the first time. Toddler pre-school meetings are scheduled approximately monthly.

New methods

Beautiful Engineering Towers have been purchased. The Technology Towers is the most challenging, core-purpose teaching concept for Science and Technology in primary education. In addition to inquiry-based and design-based learning, students develop their 21st century skills. They learn to collaborate, consult, think critically, solve problems and always work three-dimensionally with materials and tools from the lesson boxes.

From this school year, the math lessons will get an extra nice touch with the games from the math boxes of “Met Sprongen Vooruit”. Pupils appear to get better results through Met Sprongen Vooruit mathematics education. The students experience the lessons and educational games as fun and meaningful, which gives them more fun in maths. The students move, use their own bodies and their own productions ensure greater involvement. This positive interaction between content and form ensures that the results of students who are taught on the basis of Met Sprongen Vooruit immediately increase.

In addition to these newly purchased methods, this year we also started a new method for case subjects. The subjects history, geography and nature are taught using the Case method. For technical and comprehension reading, we will use the Atlantis method from this school year, where a lot of attention is also paid to reading pleasure.

Wereldwijzer 1- September 2021

Music lessons

In addition to singing in class with the teacher, the music lessons will be provided this year by the Zangexpress teacher Anja. During the lessons, the students also learn to beat and rhythm on tree wreckers.

“Teach like a Champion”

During the study days, the teachers of IKC Wereldwijs will follow the “Teach like a Champion” training course. The techniques of Teach Like a Champion are immediately applicable and aimed at better education based on shared principles. They promote a positive and active attitude in students so that they perform better.

Now that the corona measures are slowly relaxing, it is nice that parents can come back to school more often. We are happy to see you again in and around school and hope that we can involve you in all kinds of activities again soon.

Class visits and group discussions

During these weeks, class visits and group discussions take place. The students are observed and the internal supervisor sees how the lesson is designed. During the group discussion, the educational needs of the students are discussed and what may be additionally needed in addition to the basic offer in the group.

Language and math specialist

This school year Annelies works one day a week on Wereldwijs. Annelies is a language specialist and supports and advises the teachers in language education. She has now also visited classes, has tested and analysed them so that the curriculum is well suited to our students.

In addition to being a language specialist, Miss Wendy started as a math specialist, in addition to her work as a teacher. In this role she will focus on mathematics education.

Group 8

The students of group 8 have started their last year at Wereldwijs. A special year for them in which they will work towards an outflow to secondary education. In the coming months there will be the secondary education information evenings and the open days.

Wereldwijzer 1- September 2021

Learning path relationships and sexuality

In week 38 start the lessons relationships and sexuality. A team training and parent evening will take place prior to this. In a next Wereldwijzer we will inform you about the course of this.

Language classes:

When a student starts in the language class, we draw up an individual learning path. This is based on age and whether the student can already read and write in another language. It is also important in what language they do this. You can imagine that it is easier for students who can already read in English than for students who are used to Chinese or Arabic. There are different learning paths for these different students. Each learning track lists the end goals we set after 1 year in the Language Class. We also determine to which group we expect the student to transfer.

4 Weeks after the start there is an introductory meeting with you as a parent. In this, the ultimate goal of the learning path is discussed with you, and to which group she/he will go.

The learning track also contains the intermediate goals for every 10 weeks. There is a test period every 10 weeks. You can find these in the annual calendar. The next test period is in November. After these tests, we will compare the results with the intermediate goals of the learning track. In this way it is checked whether the student develops according to that learning line. This will also be discussed with you in November.

Human Resources

Master Mohamad

Fortunately, Master Mohamad is back at work after his absence due to illness. He attends the language classes in group white every day.

Introducing new employee:

Hello everyone,

I am Nawal, 26 years old and since Monday 13 September I have been working as a Pedagogical Worker in the baby group at Wereldwijs.

In my spare time I enjoy reading very much. I can do that for hours in a day. I walk a lot in recreational areas in the village where I live and I like to eat sushi with friends.

I have enjoyed my internship at SKH before. After obtaining my Pedagogical Worker diploma in 2015, I also worked for a year as an employee at SKH at various locations. Then I decided to continue my studies in 2016.

In the summer of 2020 I obtained my Bachelor of Social Work. Despite the fact that Social Work is a beautiful, rewarding and fun profession, I have chosen to get back to work as a Pedagogical Worker and I am really looking forward to that! My heart is in childcare.

De Wereldwijzer

Wereldwijzer 1- September 2021

Working with children makes me happy. The diversity in the development of children and their honest personality makes the work so challenging, innovative, beautiful and different every day. My working days will be Monday, Tuesday and Wednesday. I hope to get to know you soon.

Organisational matters

New and departing students

Regular:

We welcome:

in group 1-2 Dawud, Lequincio and Emir.

In group 5 Shahnaz.

In group 7 Ensar, Alfares and Maria.

In group 8 Yeliz.

We wish you a lot of fun and an educational time at our school.

Many new students have started in the language classes.

In group Green: Pola, Maya, Fahad, Ella and Omar

In group Red: Hriday, Aarav, Nihaal, Naomi, and Leo.

In group White: Sinhayana, Myra, Hyrannya, Efrata, Shani, Aesha and Jamal.

In group Yellow: Rayaan, Cherry, Marci, Abdulrazzak and Aman.

In group Blue: Raghav, Chai, Anvey, Duru, Elif, Delana, zane, Mohamed, Everthon.

In group Orange: Stefan and Raniya.

We wish everyone a lot of fun learning Dutch!

Wereldwijzer 1- September 2021

Photos from IKC's past period

All summer, the slide at the childcare center has served as an 'ice cream point'...

Summer is over now. Autumn and the next theme are coming!

De Wereldwijzer

Wereldwijzer 1- September 2021

GGDFlits Self-confidence

A child with enough self-confidence believes in itself and in what it can do. What do you expect from your child?

A child with a positive self-image and self-confidence tries things out, even when it comes to difficult things such as making a rollover. If such a thing is successful, it strengthens self-confidence.

Children like it when you expect something from them. They want you to see how much they can already do. But don't expect things that kids can't deliver. That destroys self-confidence. They then get the feeling that they are not good enough. On the other hand, don't expect too little. Show that you have a lot of confidence in your child, that helps build self-confidence.

10 tips!

Does your child have low self-confidence? [Read 10 tips to build confidence here.](#) Don't expect miracles in the beginning, as confidence building is slow, but it is well worth it.

movie:

[How do you make your child resilient? - YouTube](#)

Are you concerned about your child's self-esteem? It is always possible to make an appointment with the pediatrician or youth nurse associated with the school. They can think along, investigate, advise and refer if necessary. You can make an appointment on working days from 8.30 am - 12.30 and 13.00 – 17.00 via 023 7891777 or frontofficejgz@vrk.nl

Free CJG Webinar "Building children's self-confidence"

Parenting inspiration and tips from child psychologist Tischa Neve

In the early years of children's lives, an important foundation is laid for their self-image and self-confidence. It is precisely in these years that you can give children a lot to grow up into self-confident people, who know what they are worth.

Wereldwijzer 1- September 2021

Webinar content

- How do you help your child grow?
- How do you do to develop self-confidence?
- What is involved in this process and, above all, what can you do as a parent?

Tuesday, 5 October, 2021, from 8 p.m. to 9 p.m. (or watch the replay)*

For parents with children aged 1-12 years

Cost: none

Presentation: Tischa Neve, child psychologist and educator

Requirements: laptop, tablet or smartphone

→ Sign up for this webinar for free: www.cjghaarlemmermeer.nl/nieuws

* If the time of the webinar does not come out, no problem! If you register, you will receive a link with which you can watch the webinar for another month.

Do you have a question about growing up and parenting? Contact the CJG Haarlemmermeer by phone **023 55 41 588** or the online contact form at www.cjghaarlemmermeer.nl/contact
